MERCEDES OM924 / OM926 RANGE OF ENGINES

We now stock **gaskets, valves, rings, bearings & head bolts!**

TECHNICAL INFO FITTING RECOMMENDATIONS

The **MAHLE** Original repair **pistons** are ready for installation with mounted **piston rings**.

Piston diameter, installation clearance and, if applicable, direction of installation are marked on the piston crown. The stated piston diameter added to the corresponding clearance gives the cylinder diameter.

In the case of pistons that have a **graphitised skirt**, another 0.015-0.020mm should be deducted from the measured piston diameter to allow for the thickness of the layer; this then gives the nominal diameter for the piston; which is stamped on it:

Measured diameter on layer of graphite	90.000mm
Less diameter identified on piston crown	89.960mm
Gives thickness of the layer of graphite	0.040mm
